Svaghet

Motivation

Restriktioner

Personalkrävande

Lång vårdtid

Tidig
aktivering/ mobilisering

Bevara muskelmassa och funktion

A healthcare professional, likely a nurse or respiratory therapist, is shown in profile, wearing green scrubs and blue gloves. She is focused on adjusting a piece of medical equipment, possibly a ventilator or a nebulizer, which is connected to a patient. The background shows a typical hospital room with various medical devices and monitors. A large, semi-transparent white circle is overlaid on the left side of the image, containing text.
